

View of profile

Pencil edge - mat:

The mirror edges are grinded on the cutting surface, securing an even surface.

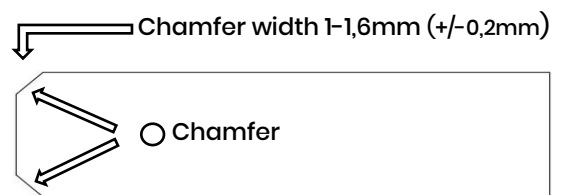

Edges are chamfered in 45° as shown in the drawing.

Pencil edge - polished:

The mirror edges are grinded on the cutting surface, securing an even surface.

The edges are polished.

Pencil edges are always used on our TÜV certified doubled mirror doors, as primary on 4mm single sided mirror. Pencil edge mat can also be used on 3mm single sided mirror.

Our highest quality is achieved by using the pencil edges.

MC edge:

The mirror edges are grinded in the round shape as Shown in the drawing.

BC edge:

The mirror edges are grinded in the round shape as Shown in the drawing.

The mirror edges are also polished.

MC / BC edges are solely used for single sides mirror in 3mm or 4mm gauge.
